

ORLEANS PARISH COMMUNICATION DISTRICT

New 9-1-1/EOC Facility

New Orleans, Louisiana

SGA provides full design services to Orleans Parish for a new 9-1-1 and Emergency Operations Communication Facility. The facility, fully hardened and secured, encompasses 46,000 SF and supports all needs of the local emergency communications agencies. Planned to sustain extreme storms and flooding, the facility design also responds to the significant affects of the warm climate and excessive sun exposure.

Additionally, SGA assisted in the design of temporary and interim facilities for the 9-1-1 agencies whose existing facilities were rendered unusable in 2005 by Hurricane Katrina.

Estimated completion time to be determined
