

ATLANTIC CITY

New Public Safety Building

Atlantic City, New Jersey

Designed to accommodate the various needs of the growing City, the new 68,000 SF public safety facility is designed to withstand hurricane force winds and, through a third floor glass operations center, provides a unique vantage point for managing emergencies. Representative of the strength and robustness of the groups housed within, the design also reflects the visual influence of both the local casino industry as well as the resort vernacular of an earlier era.

Construction complete 1997

The project shown above represents an L. Robert Kimball & Associates project completed by principals of SGA. Photography by Jim Schafer Location Photography, Pittsburgh, PA.
