

## TWIN VALLEY SCHOOL DISTRICT

### Twin Valley High School — Additions and Renovations

Elverson, Pennsylvania

When approaching their additions and alterations project, Twin Valley School District chose to include expansion of their Fitness and Wellness programs as part of the overall programming requirements and, after reviewing numerous options, elected to construct a stand-alone 12,000 SF two-story structure to achieve their goals. The project also included a 2,500 SF addition to the existing High School as well as alterations to 14,000 SF of existing science labs.

The Twin Valley Physical Education Center is constructed on a steep hillside adjacent to the existing High School football and track stadium field. The multi-level building offers access from the upper level to the existing gymnasium facilities. Additionally, the stadium field can be accessed directly from the lower floor level.

The facility includes a fitness room and multi-purpose space on the upper level. The lower level houses two team locker rooms, team shower facilities, an officials locker room, and a training room. The fitness room is equipped with free weight and cardiovascular training equipment and takes full advantage of surrounding views. Large expanses of glazing offer plenty of natural light, spectacular views over the valley and a “sky box” view of the football stadium.

Construction complete August 2007
