

## TWIN VALLEY SCHOOL DISTRICT

### Twin Valley Middle School — Additions and Renovations

Elverson, Pennsylvania

In this project, 68,000 SF was added to the existing 125,000 SF Middle School, significantly expanding the classroom areas as well as all core and support spaces. The grade structure was realigned and new site circulation patterns were required as a result. The education design strives to achieve the “school within a school” concept by centering the organization on a learning and media center, and the new additions work to compliment and enhance the existing aesthetic of the building. The addition of two artificial turf playing fields were also included as part of the project.

Construction complete November 2008
